

Mohamed Alkinany Flutter Developer

 malknany98@gmail.com  +201021986038  Egypt  mohammedAlkananiy  malkinany

SUMMARY

Flutter Developer with 2+ years of experience in designing, developing, and publishing cross-platform mobile applications for **Android** and **iOS** and **Disktop**. Strong expertise in **API** integration, state management (**Bloc**, **GetX**), **Firebase services**, **CI/CD** pipelines, and **clean architecture**. Passionate about scalable solutions, performance optimization, and **Agile** development practices.

EDUCATION

Bachelor's degree in computer Science, 2019 – 2023
Faculty of Computers and Information Mansoura University
Graduation Project: Recruitment & Training App (A+) for companies and developers, supporting job posting, candidate evaluation, and technical interview preparation.

WORK EXPERIENCE

- GoSportNetWork**, Flutter Developer  03.2025 – Present | Cairo
- Contributing on the GoSports Version 2 app with improved performance and scalability.
 - Implemented Firebase Cloud Messaging, deep linking, and app lifecycle management.
- Khatab web**, Flutter Developer  06.2024 – 03.2025 | Mansoura
- Developed e-commerce and booking solutions with Google Maps and push notifications.
 - Collaborated with backend team to integrate REST APIs and optimize performance.
- Code Click**, Flutter Developer 12.2023 – 06.2024 | Mansoura
- Built ride-hailing and delivery apps with live tracking and secure payment integration.
 - Enhanced UX by improving app navigation and reducing load times.

PROJECTS

GoSports NetWork
[**GooglePlay**  - **AppStore** ] Worked on a large-scale sports management platform serving **100,000+** active users across **1,500+ foundations**, including **Real Madrid Academy** (Spain). Built real-time attendance & check-in/out system integrated with physical gates. Developed financial modules: **subscriptions, payments, reports**, and multi-currency handling. Implemented digital player cards and player evaluation systems. Integrated **Apple Pay & Google Pay** for secure digital payments. Designed an offline-first architecture with 100% local caching using "Isar", minimizing server reads and ensuring high performance. Ensured scalable architecture using **BLoC, Clean Architecture**, and modular Flutter components.

دليل الطالب
[**GooglePlay**  - **AppStore** ] A Haraj-style student marketplace & services platform helping students find universities/institutes. Engineered the application using **Clean Architecture** and the full **BLoC** (Event-Based) pattern to handle complex business logic and state transitions effectively. Implemented '**Hive**' for efficient local caching of user preferences and session management. Designed dynamic listing modules and advanced search capabilities to support a wide range of categories and services

SalamTaxi
[**GooglePlay** ] Engineered a real-time ride-hailing platform, 'Salam Taxi,' connecting passengers with drivers through a seamless geolocation interface. Integrated **Google Maps** SDK and Directions API for precise **live tracking, route optimization**, and dynamic fare calculation. Built a scalable codebase using Clean Architecture and the BLoC pattern to manage complex socket-based ride states (booking, arriving, in-ride).

اصلاح
[**GooglePlay** ] Developed a comprehensive on-demand maintenance application, 'Esla7,' facilitating the booking of home services like plumbing, electricity, and AC repair. Engineered the system using **Clean Architecture** and the full **rebuilder** pattern to handle the **multi-stage lifecycle** of service requests effectively. Integrated dynamic category filtering and order tracking modules to enhance the customer experience.

Ghena Alshaam

[[GooglePlay](#)] [[AppStore](#)] Developed a visually stunning retail e-commerce application, 'Ghina Al-Sham,' designed to offer a premium shopping experience. Engineered the application using **GetX** to achieve a lightweight architecture, combining efficient reactive **state management** with **dependency injection**.

الأمين الراعي

[[GooglePlay](#)] This application allows customers to order meat products conveniently and efficiently. The app provides a comprehensive platform for customers to select, order, and receive meat products with various features ensuring quality and satisfaction.

مزاد - Mazad

[[AppStore](#)] Is a bidding app where users can sell items or bid on items listed by others. The highest bidder wins the item. The app allows users to start and participate in auctions directly from their devices.

Manaber (freelance project)

[[GooglePlay](#), [Desktop](#)] The aim of the application is to facilitate interaction between the authorities of the Manaber Al Amal Physical Therapy Center for Disabled Children and its sponsors In terms of recording user data in the center's system to save data on their visits periodically and transfer it to specialist doctors .

TECHNICAL SKILLS

State Management

Bloc, Getx.

CI/CD

GitHub Actions, Fastlane, Firebase App Distribution

Google Maps implementation

Markers, polylines, and location services.

Local Data Storage

Shared Preferences, Hive, Isar.

Payments & Financial Systems

Digital Wallets

Subscriptions, Online Payments (Visa, Apple Pay, Google Pay), Transaction Lifecycle Management

API

WebSocket, Restful API, Dio, Retrofit, Http.

Design Patterns

MVVM, MVC

Version Control

Git, GitHub, GitLab, SourceTree.

Firebase integration

Crashlytics, Realtime Database, Cloud Messaging, Firebase Storage, Firebase Database, Remote Config, Analytics.

App Publishing

Google Play, App Store.

COURSES & TRAINING

Problem Solving L1, Coach Academy

08.2025 – 10.2025 | Cairo

CCIC, FCIS

07.2022 – 10.2022 | Mansoura

Clean Architecture In Flutter 3 (Arabic), Ismail Elmogy

07.2023 – 09.2023 | Udemy

Flutter BLoC State Management & Firebase [2025] From Scratch, Maftuna Zokirova

07.2025 – 08.2025 | Udemy

LANGUAGE

English

Very Good

Arabic

Native

Volunteering & Activities

CIS (Student Activity) — Video Editing & Motion Graphic

GOC (Student Activity) — Video Editing & Media Team

Mega (Student Activity) — Logistics - Event and Content creation
